

Aslam Naleem

Cybersecurity Analyst

aslam.m.naleem@gmail.com +64223024451 Mount Albert, Auckland, New Zealand

PROFILE

IT professional with a background spanning network infrastructure, IT asset management, and ITIL-aligned service delivery, now building toward a dedicated cyber security career. Holds an ITIL 4 Foundation certification and AWS Solutions Architect credential, with hands-on experience managing access controls, Active Directory, compliance documentation, and vendor relationships in a regulated school environment. Brings a detail-driven, risk-aware mindset and the ability to communicate technical concepts clearly to non-technical stakeholders.

WORK EXPERIENCE

Document Specialist

Jan 2022 – Apr 2022

RR Donnelley · Sri Lanka Full Time

- Conducted quality checks on SEC compliance documents for high-profile clients including Apple and Wells Fargo, upholding rigorous accuracy and regulatory standards.
- Maintained and validated accurate records across company databases, supporting audit-readiness and data integrity.
- Managed structured workflows using cloud-based applications, consistently delivering outputs on time and in line with compliance requirements.
- Collected, validated and distributed information across teams, ensuring clear and timely communication in a detail-driven environment.
- Contributed to organisational efficiency through agenda management, reporting, and coordinated stakeholder communication.

IT Engineer

Aug 2022 – Jul 2025

Safa British School · United Arab Emirates Full Time

- Administered Active Directory including user account creation, password management, group administration, and access permissions, supporting identity and access control practices aligned with ITIL standards.
- Configured and maintained networking equipment including routers, switches, firewalls, and access points, monitoring network performance for security and efficiency.
- Managed IT asset records, software deployment, and procurement processes, maintaining audit-ready documentation across the organisation's technology environment.
- Oversaw Microsoft 365 Admin, Azure Active Directory, and Adobe Admin Console, ensuring system access, user authentication, and platform security remained current and compliant.
- Coordinated vendor relationships and technology procurement, ensuring timely availability of resources while applying structured risk and compliance considerations.

Asset Management Analyst

Sept 2025 – Present

IBM · New Zealand Part Time

- Maintained accurate inventory and asset records, generating operational reports that supported audit-readiness and programme compliance.
- Applied structured tracking workflows to ensure records remained consistent, current, and aligned with organisational standards.
- Coordinated with internal teams to deliver timely updates and clear communication across asset management systems.
- Supported data accuracy and reporting in a fast-paced, detail-driven environment, demonstrating a proactive and solutions-focused approach.
- Upheld process and compliance standards through reliable cross-team communication, demonstrating accountability and ownership at every step.
